

OCME Engineer Evaluation and Approval

This is to certify that

has successfully completed the final part of the process to become an OCME Certified Engineer. This portion included the following:

1. Getting the locomotive from the storage shed
2. Configuring the locomotive, riding cars, and caboose into a train
3. Check to make all systems are ready to go
4. Following the procedure to start the locomotive
5. Perform on-track evaluation of the engineer driving the train
6. Returning the train to the storage shed(s) ready for the next user

The above person is now a fully Certified OCME Engineer and is entitled to the Engineer's Badge, an official certificate, and fully understands the duties and responsibilities of being an OCME Certified Engineer.
